Annual Report
Master Recycler Program
Bureau of Planning and Sustainability
July 1, 2018-June 30, 2019

Program Description

The Master Recycler Program is a community education and involvement program on sustainable consumption, toxics reduction, composting and recycling. The program offers three trainings a year, rotating locations throughout the Portland metro region and community-designed courses. Participants gain training on consumption and outreach techniques. Graduates then commit to thirty hours of community engagement. Master Recyclers volunteer at local events and through individual projects. Master Recyclers also receive ongoing training and support after the course that includes a monthly newsletter, a website, quarterly open houses, volunteer placement with partners, an assigned mentor and assistance on individual projects.

New Community-Designed Course and Program

Since its inception in 1991, individuals attend the 8-week course and join forces with fellow Master Recyclers, volunteer for community partners, and bring information and resources to their own communities. The 8-week course is offered three times once in each county of the region.

For the first time this year, the Master Recycler program provided two additional courses aimed at providing resources, training, a volunteer workforce, and project development for community-driven initiatives.

The two courses tested the concept that the Master recycler program could provide a platform and resources for specific communities to come together as a group and design sustainability projects that meet their own goals and aspirations.

The Community Designed Courses:

- Provide community-specific relevant information (this may shift information to be culturally relevant, age appropriate, translated/interpreted etc.).
- Identify resources to remove barriers such as childcare, interpretation, food, or transportation.
- Responds to community-led interest in the program.
- Partners with existing community organizations to co-design the course.
- Focuses on bringing resources and support for community-specific projects and initiatives.
- Provides access to a certification program for individuals who don't have access otherwise.

Two courses took place this fiscal year. Three more are in development.

In the fall 2018, three Home Forward public housing communities joined in a pilot Master Recycler course designed for and by them. The pilot tested ways people of color, Spanish speakers, low-income communities, renters, and people who live in multifamily housing could remove barriers to equitable access to the benefits of the program, while tailoring training and resources for sustainability initiatives driven by priorities of these communities.

Trash for Peace, Metro, the Master Recycler program and the community members themselves co-designed the pilot course and developed volunteer projects that benefit the community. The Cities of Portland and Gresham also provided resources and content for the course and continue to support the ongoing projects.

In the spring of 2019, Centro Cultural and Washington County co-designed with the Master Recycler program the first ever community-based, culturally specific course where every participant speaks Spanish. Metro and Adelante Mujeres also provided content for the course and ongoing support for projects.

Both communities have indicated that there would be interest in a second course, meanwhile Metro and the North by Northeast Health Clinic are working with the Master Recycler program to co-design a winter course serving their mostly African-American community.

Some of the results of these courses are integrated into the report for the year.

The Way We Get Things Done

Impacts of the Master Recycler Program: behavior change, equity and building community wealth.

Behavior Change: *Goal: Spur individual and family action through awareness-building, outreach and involvement*

- 120 people learned effective ways to recycle, compost, reduce toxics and consume sustainability by attending a course.
    - 28 in fall Washington County,
    - 31 in winter Multnomah County,
    - 27 in spring Clackamas County,
    - 20 in the Trash for Peace course and
    - 14 in the Centro Cultural/Washington County course.
- 54 speakers provided relevant and current information about actions people can take.
- Workshops and practice sessions provided training on outreach technique and behavior change theory to empower Master Recyclers to spur action in their own communities.
- Tours this year included
    - Agilyx Inc.
    - Community Warehouse

    - Free Geek
    - Habitat for Humanity Restore
    - Hillsboro Library of Things
    - Hillsboro Landfill
    - Material Recover Facilities
    - Metro Transfer Stations
    - Metro Hazardous Waste Facility
    - Nature's Needs Compost Facility
    - Rebuilding Center
    - SCRAP
    - Urban Gleaners

- Web, social media, lectures, workshops and tours were provided to graduates to keep them up to date. The monthly newsletter included the following articles:
    - Make Every Thread Count
    - FAQ and Background on Current Recycling Climate
    - Planet-Friendly Painting
    - Pondering a Puppy's Ecological Pawprint
    - Master Recyclers Tour Agilyx Inc.
    - Oregon Nonprofits Cash in with Bottle Drop
    - Take Action in 2019!
    - Check Out the New Things in the Clackamas Libraries!
    - Three Problem Paper Products
    - Taking the Repair Movement to a New Level
    - Metro Bag Program for Houseless Community Takes Off
- Master Recyclers had over 400,000 contacts in the community.

Incorporate equity in sustainability engagement
Goal: Address institutional, technical and social constructs that keep communities of color and low-income communities from participating in sustainability efforts and include their world view and lifestyles in vision of sustainability. The class is asked to complete a demographics survey. Survey data reflects only the people who responded, and people can choose more than one in several of the questions.

- 21 partial or full scholarships were provided this year to attendees who requested them.
- 30% of respondents stated that their household income is less than $25,000
- 49% of respondents are renters
- 44% live in a multifamily community
- 43% identify as people of color
- The following languages (other than English) are spoken at the home of respondents: Spanish, Amharic, Mayan.
- 10 speakers for the course were people of color. Two new topics on equity were added to the presentation list including Just Transition and the new Metro Homeless trash collection bags.
- The Multnomah County class was held on SE 161st to offer better access to East County residents.
- The Clackamas and Washington County classes were filled by people who live or work in those counties, providing more regional representation.

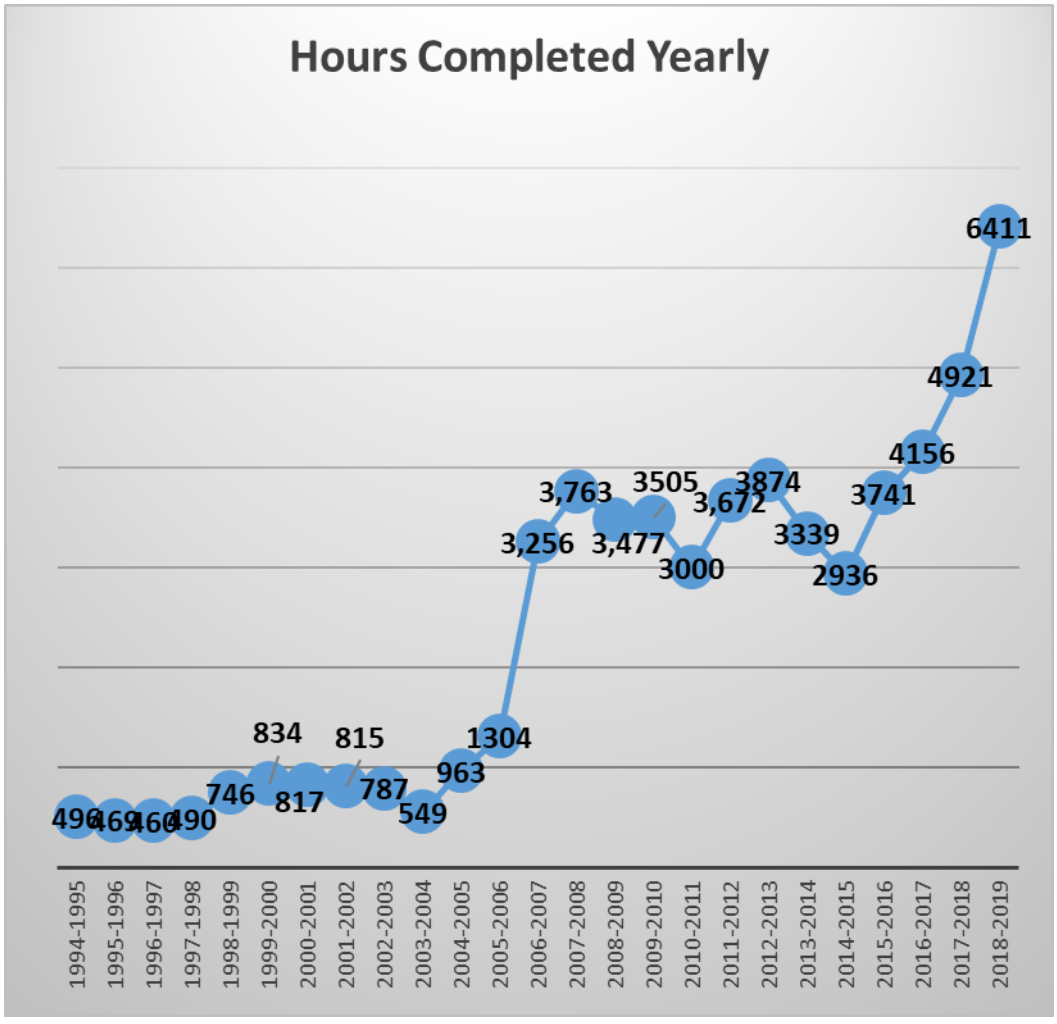
Contribute to community wealth

Goal: Build partnerships that are mutually beneficial. Leverage and highlight community sustainability efforts. Foster ongoing relationships with community leaders.

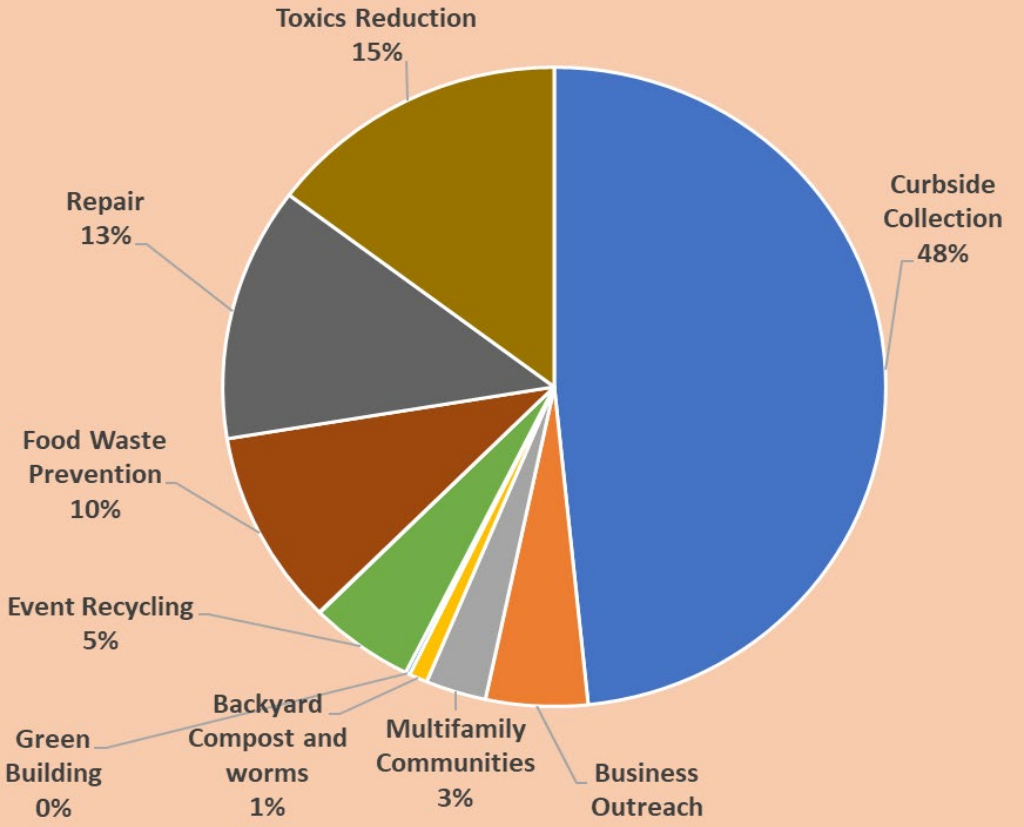
- Master Recyclers volunteered more than 6400 hours this year, contributing a value of $163,000 to the community.
- Master Recyclers played various roles in Repair Fairs from fixers, organizers, greeters or answering recycling questions while people waited for their fix.
- Master Recyclers worked on projects in 23 schools including green teams, fundraising, event planning, sustainability events, presentations and waste audits.
- Master Recyclers spent about 2700 hours on individual projects to support efforts important to their own communities of faith, workplaces, neighborhoods, friends and family.
- 30 community partners leveraged about 3700 hours to engage people in conducting outreach and education campaigns, working with youth, recycling at river cleanup events, organizing tool libraries and repair fairs, creative reuse demonstrations, Earth Day celebrations and advocacy.

<u>Volunteer Activities</u>

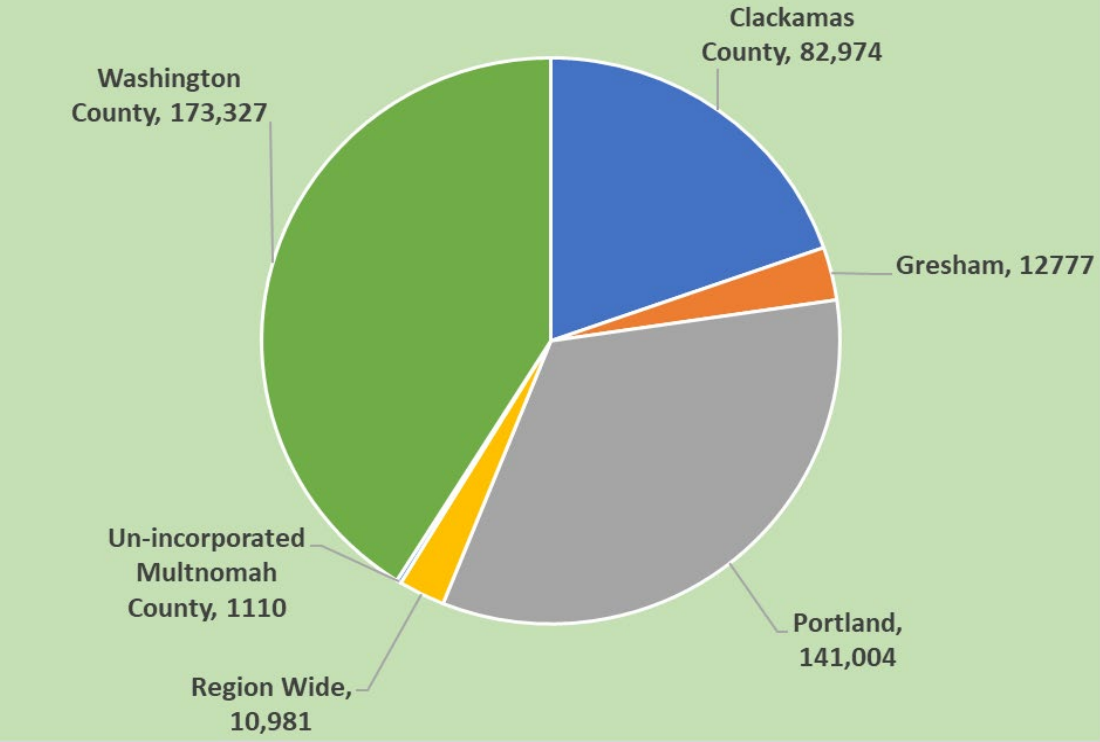
This was the highest number of volunteer hours in the history of the program! Master recyclers reported 6411 hours. The four charts below demonstrate volunteer's hours completed by year and contacts by region, topic and activity type for Fiscal Year 2018-2019.

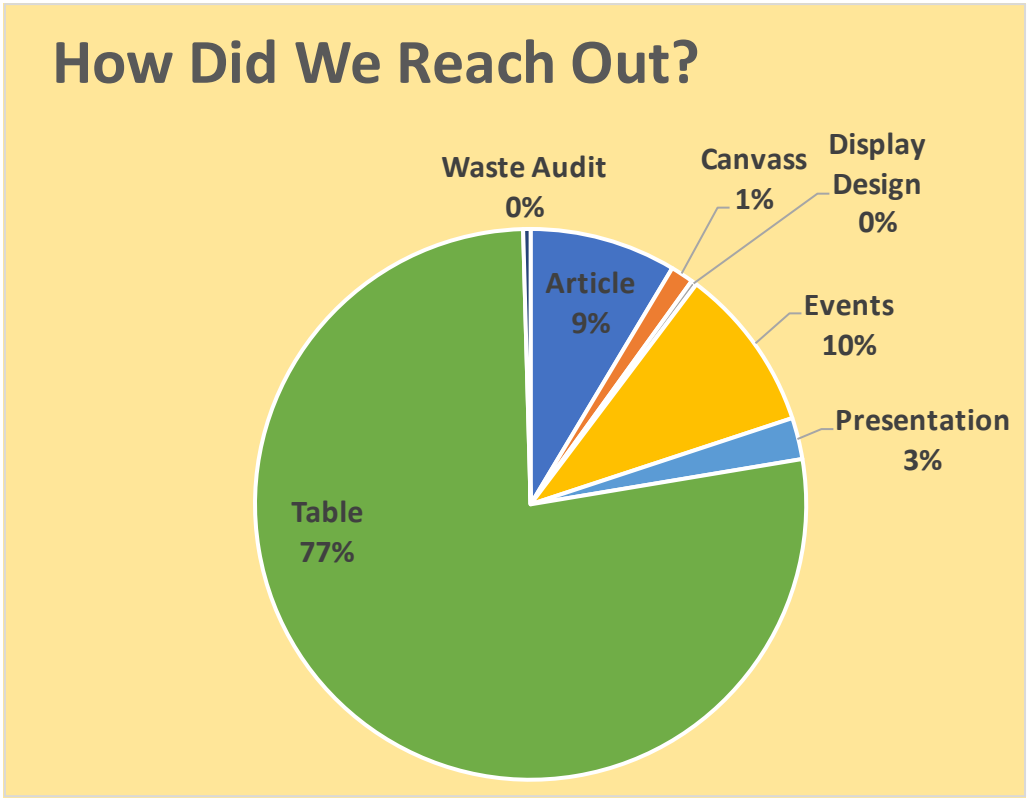


What Did We Focus On?



How Many People Did We Reach?

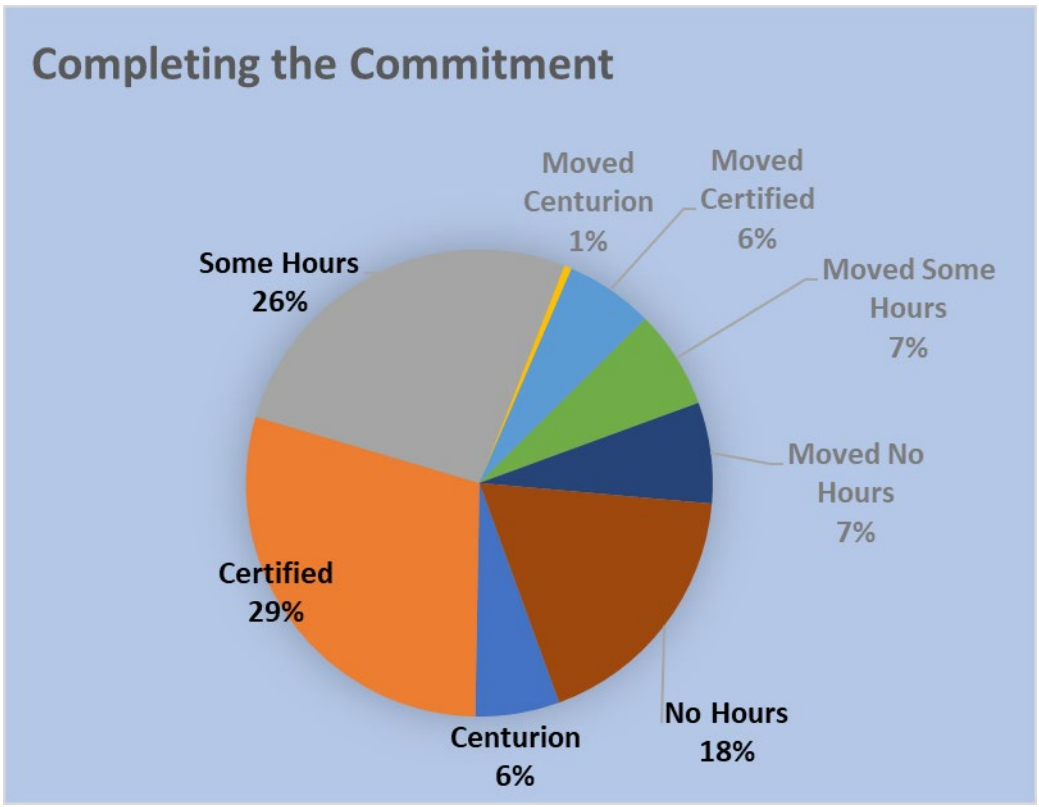




Master Recycler Certification

Thirty-two Master Recyclers were certified in fiscal year 2018-2019, bringing the total to 731 or 42% of the 1,730 Master Recyclers.

Below is a chart that demonstrates the percentage of the total number of Master Recyclers who have completed their 30-hour commitment to date.



FY 18/19 Expenses and Revenue

Expenses

Personnel			
	Program Coordinator + benefits	$ 123,051
